Re: PM_{2.5} redesignation request for the 1997 PM_{2.5} Annual Standard for the Dayton-Springfield Area

Dear Administrator Hedman:

I am writing to formally request a redesignation to attainment of the Dayton-Springfield area (Clark, Greene, and Montgomery Counties) with respect to the 1997 PM_{2.5} annual standard. The enclosed submittal combines the redesignation request and the required maintenance plan for this area.

Monitoring of existing air quality indicates that the 1997 National Ambient Air Quality Standard (NAAQS) for PM_{2.5} has been attained throughout this area based on 2008-2010 air quality data. Emissions projections indicate that current controls, existing State rules, existing federal rules, and Ohio's PSD program will be more than sufficient to maintain the NAAQS indefinitely into the future. These programs will, therefore, constitute the attainment and maintenance plan for the Dayton-Springfield area.

The enclosed information, compiled by the Ohio Environmental Protection Agency (Ohio EPA), Ohio Department of Transportation, and the Miami Valley Regional Planning Commission (MVRPC), shows significant emission reductions in point and mobile sources since ambient exceedances have occurred. A significant portion of the improved air quality can be attributed to federal programs for the mobile source sector, the regional reductions associated with the NO_x Trading Program, and the Clean Air Interstate Rule (CAIR).

Ohio EPA notified the public of the draft and the opportunity to provide comments on March 29, 2011. The public hearing for this package was held on May 3, 2011, in Dayton, Ohio.

If you have questions, please contact Jennifer Hunter in our Division of Air Pollution Control at (614) 644-3696.

Sincerely,

Scott J. Nally
Director
