Modifications of the Hazardous Waste Facility Installation and Operation Permit will authorize Von Roll America, Inc. to make the following changes:

**Class 2 Modification:**

To add waste codes K-174 through K-178 to the VRA Ohio Hazardous Waste Facility Installation and Operation Permit. This modification will allow VRA to accept waste carrying these codes for storage in tanks and containers and for treatment in accordance with the facility's permit. Two of the wastes are generated by the chlorinated aliphatics industry (K-174 and K-175) and three of the wastes are generated by particular production processes related to the inorganic chemical industry (K-176 through K-178). The wastes were recently added to Ohio Administrative Code.

VRA had been receiving, storing, and treating wastes carrying the waste codes K-174 through K-178 on the effective date of the regulatory change that added the waste codes to the Ohio Administrative Code and was deemed to have a permit by rule for the newly regulated hazardous wastes. DHWM evaluated the waste to determine if the facility could receive, store and treat the waste, whether terms and conditions needed to be added to the permit, and to ensure proper management at the facility.
